

LP EasyCEP/4DPD GER

DPD Germany integration

LP EasyCEP **seamlessly connects** your SAP S/4HANA system to DPD Germany, enabling a fully integrated shipping process. From **automated shipment creation and label printing** to **shipment tracking** – everything is handled directly within the standard SAP process.

Ready-to-Run standard features

- Shipping of DPD Standard parcels (product code CL)
- Email notification to customers
- Printing of parcel labels in ZPL or PDF format
- Various printer determination rules
- Various sender address determination rules
- Test transaction for calling the DPD interface
- Transaction for administering Web Service registrations
- Track & Trace integration in the shipping module
- To use the ready-to-run features in the EWM module, a customer-specific implementation in BAdI /SCWM/ESI (Express Service Processing) is required. A sample implementation is included.

Customer-specific features

- DPD Express (domestic) from Monday to Friday by 8.00 am
- DPD Express (domestic) by 12.00 noon
- DPD Express (domestic) by 6.00 pm
- DPD Express (Saturday) by 12.00 noon
- Track & Trace integration in the shipping module for DPD tracking numbers generated in SAP EWM

Technical integration

SAP Shipping Module

LP EasyCEP uses **SAP Express Shipment Interface (XSI)** – the standard CEP interface in SAP for shipping parcels via parcel service providers.

SAP EWM

Integration is carried out via the **ESI interface** and is directly embedded into the packing and workstation processes.

Installation & Go-Live

LP EasyCEP is installed via SAP Transport. Thanks to pre-configured standard processes, it can be deployed quickly, including customer-specific extensions.

Support & Maintenance

LogiPlus supports you, from design and development through to implementation and ongoing operation – including support, maintenance and further development.

Vendor / Provider

LogiPlus Consulting GmbH
Torfstecherring 27
67067 Ludwigshafen
